A close-up photograph of a snake, likely a Eumeces species, coiled on a forest floor. The snake has bright yellow and orange patterns with black spots and stripes. It is resting among fallen leaves, sticks, and moss. A solid blue rectangular box is overlaid in the upper right corner, containing the text "Eumeces spec." in white.

Eumeces spec.

*Pseudoeurycea cephalica manni*

*Pseudoeurycea belli*

A black pig with a white patch on its back is pulling a simple wooden cart along a rocky path. The cart has two long wooden poles extending from the front. The pig is moving towards the left of the frame. In the background, there is a dense thicket of green bushes and trees. A large, light-colored rock sits on the ground to the right of the path.
